

Environmental Policy Statement

Our Purpose

MAKING A DIFFERENCE
WITH REAL CARE

Our Values

This policy sets out Belron® UK's (trading as Autoglass® and Laddaw®) approach to environment management, which contributes towards our company purpose of making a difference with real care. We recognise that our activities may have an impact upon the environment, both locally and globally, and we aim to continually improve our environmental performance and to reduce our impact. Reducing our environmental footprint is key to our purpose and objectives. We are committed to doing the right things and doing them right. We care about and seek to protect the environment.

Belron® UK has implemented and maintains an environment management system which complies with and is externally assessed against the requirements of ISO14001:2015. This is in order to define, measure and control our activities and to minimise our environmental impact.

We will:

- ✓ Identify, monitor, and manage the current and future aspects of our operations that significantly impact on the environment in line with a culture of continuous improvement.
- ✓ Comply with relevant environmental legislation and other appropriate environmental requirements and continue to review and improve our environmental management system to ensure compliance.
- ✓ Seek to minimise, where possible, damage to the environment and prevent pollution from our activities.
- ✓ Source products and services in a responsible and sustainable way.
- ✓ Commit to reduce our carbon emissions to zero and utilise our carbon footprint data to support our action planning.
- ✓ Ensure efficient use of material resources in our activities, including (but not exclusively) energy used in our buildings, transportation, glass, consumables and packaging materials.
- ✓ Reduce waste generation where possible, re-using what we can, maximising recycling and recovery opportunities and minimising waste to landfill.
- ✓ Provide the resources, training and information necessary for our people to comply with and implement this policy while improving awareness of environmental risks and opportunities.

This policy will be reviewed annually to ensure that the management system and associated environmental objectives are effective, consistently implemented and that we continually improve our performance.

Responsibility for the management of environmental issues lies with all Belron® UK employees. The Executive Team and Directors will ensure that sufficient resources are provided to implement this policy.
